-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address.

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 22 May 2002.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Objections

3. Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim(s) 8 does not further define a conveyor.

4. Claim 11 is objected to because of the following informalities:
It is a method claim(s) dependent from an apparatus.
Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claims 9-10 are rejected under 35 U.S.C. 112, first paragraph, because the best mode contemplated by the inventor has not been disclosed. Evidence of concealment

of the best mode is based upon that the best mode of "adapting" the arrangement has not been delineated.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim(s) 1, line(s) 5 "for" is unclear as it fails to positively recite an irradiator. Questions of intent are raised. The examiner suggests replacing "for subjecting" to --that subjects--.

With regard to claim(s) 4, the relationship between the sprayer and the means for directing is unclear as well as the brushes and the brush roller.

Regarding claim 4, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

With regard to claim(s) 9, the relationship between the arrangements of claim(s) 1 & 9 is unclear.

With regard to claim(s) 11, a method claim(s) dependent from an apparatus is indefinite as it is directed to more then one statutory invention.

With regard to claim(s) 12, a surface is insufficient to define a conveyor. The examiner suggests reciting a conveyor comprising a surface or indicating that the "removing" occurs during foodstuff conveyance.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-3, 6, 8, 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Claude et al. (FR 2 744 820).

Claude et al. (FR 2 744 820) disclose:

- a conveyor, Figure(s) 1-3;
- a sprayer 4;
- a brush or scraper at the flexure 5;
- UV irradiation 3, Figure(s) 1.

Claim Rejections - 35 USC § 103

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 1-8, 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Claude et al. (FR 2 744 820) in view of Krooss.

With regard to claim(s) 7, 14-15 Claude et al. (FR 2 744 820) may lack automatic control.

It has generally been recognized that the use of a conventional control to automate a previously manual operation involves only routine skill in the art. *In re Venner*, 120 USPQ 193 (CCPA 1958).

With regard to claim(s) 5, as the applicant has failed to show criticality or unexpected results, power application is considered to be a matter of design choice.

It would have been obvious to modify Claude et al. (FR 2 744 820) to provide automatic control in order to increase effectiveness.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Dillon, Jr. whose telephone number is (703)305-9728. The examiner can normally be reached on 8-5:30, every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Ellis can be reached on (703)308-2560. The fax phone numbers for the organization where this application or proceeding is assigned are (703)305-7687 for regular communications and (703)308-0552 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-1134.
